New Eriez® Building Gives Company Additional Space to Manufacture Large, Innovative Recycling Equipment

Erie, Pa. — Erie, PA-based Eriez® has purchased a 114,000 square foot building in Erie, approximately 15 miles from its World Headquarters facility. According to the company, the expanded space will enable the company to build its largest, most cutting-edge and hottest selling recycling equipment in-house, rather than through sub-contractors.

“The demand for Eriez’ state-of-the-art recycling equipment has skyrocketed in recent years,” explains Tim Shuttleworth, Eriez President and CEO. “Our new building will help us streamline our manufacturing processes, which will result in quicker delivery for our customers.”

Shuttleworth explains that adding manufacturing space is crucial as Eriez continues to grow at a rapid pace. “Even during these tough times, Eriez is on an upward path, setting new records for orders and sales,” he says. “Sales of our recycling industry equipment are strong and steady, due in part to the considerable investment we’ve made in the past several years to new product development, personnel, our sales organization and aggressive marketing efforts.”

In addition to recycling equipment, the new building will also handle the manufacturing of Eriez’ Column Flotation Cells and Hydroflow® Fluid Filtration and Recycling Equipment as well as housing the company’s 5-Star Service® Center . According to Shuttleworth, Eriez plans to finish some renovations to the space and move operations in by the end of 2011.

Eriez manufactures and markets its products through 12 international facilities located on six continents. The company isn’t just growing in Erie, it’s expanding operations around the world. The company’s operations in Canada and India will be moved from existing facilities to larger buildings in the area and a second manufacturing facility is being added in China to meet Eriez’ mounting order volume overseas.

Eriez is recognized as world authority in advanced technology for separation, vibratory and inspection applications. The company’s separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through ten international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada.
