Eriez Eriez® Offers Free Literature Featuring Metalworking Fluid Filtration Products from its Hydroflow® Division

Erie, Pa. — [The Eriez® Hydroflow® line of Fluid Filtration products](#) help metalworking companies maximize coolant effectiveness and longevity while improving productivity and reducing disposal costs. Customers can now receive a wealth of valuable information about this product line through a free, full-color brochure available from Eriez.

"Metalworking Fluid Filtration Systems" take readers through a host of fluid filtration solutions specifically geared to the type of fluid used in metalworking operations.

Fluid filtration applications range from individual machine tools or cells to complete plant-wide centralized systems supporting a variety of metalworking operations using water-based coolants to straight oil lubricants. Some of the solutions highlighted in the literature include:

- The Eriez Star Filter® system, an innovative vacuum element filtration that eliminates problems associated with rotating vacuum drum filters.
- Eriez' Rolled Media Vacuum Filter, a fully automatic filtration system providing filtration levels of 10 microns through an innovative sealing method that prevents solids by-pass.
- The CBN Series Vacuum Filter for grinding and sub-abrasive machining, which enables filtration up to 10 microns and flow rates up to 2,000 GPM.
- Machine-side filtration, including centrifuges available in standard or high performance single and double bowl models with a variety of tank sizes and pump pressures. These systems are often combined with high capacity cartridge filters to polish the fluid to an even greater level.

To download "Metalworking Fluid Filtration Systems" in PDF format, visit www.eriez.com/hydroflow. To obtain a hard copy of this literature, contact Eriez and request brochure FB-100.

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through 12 international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send e-mail to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
